

March 12, 2013

We ask the Montana legislature to TABLE bond funding of the proposed South Campus of the University of Montana until an Environmental Impact Statement (EIS) is completed. The proposed South Campus is in the middle of residential, family-oriented neighborhoods. The impact of the proposed campus on these families has not been considered. An EIS, at a minimum, should address issues of housing, parking, traffic, school children crossings, noise, trash and the transport of students between the proposed South Campus and the main campus.

Thank you for your consideration of this important matter.
